

## MATHEMATICS

DIRECTIONAL PHRASES FROM OGT	VOCABULARY WORDS OR PHRASES FROM OGT	
Give mathematical evidence	Average rate	Irrational
Show how both can be correct	Box-and-whisker plots	Line segments
Showing work		Net profit
Providing an explanation	Congruent	Nets of shapes
Which letter best represents	Coordinate plane	Parallel
Which dimensions could be used		Parallelogram
Provide an explanation to support your answer	Corresponding angles	Per unit
Describe a transformation	Corresponding sides	Perpendicular
Which of these equations represent	Cubic	Polyhedral
Write and label an equation that represents	Cylinder	Probability
Describe a method that can be used to make this decision	Cylindrical	Quadrant
Analyze how the graphs differ and write a hypothesis to describe	Density	Quadrilateral
How many different _____ are possible	Equivalent	Radius
Use mathematics to justify	Expression	Rate of descent
What is the mean		Rectangular
Predict the number	Faces	Scientific notation
Which of these is the median	Fractional Part	Sequence
Which of the following statements is true	Higher median	System of equations
What statement can be made about the data		Vertex
Which equation is equivalent to	Inequality	Wider range
Which inequality should _____ use to determine		Vertical
